

5. Identify summarizability potential problems in your star schema and indicate preferred resolutions of the summarizability problems. For incomplete dimension-fact relationships, you should also indicate if columns in a dimension table allow null values.

Answer:

There are missing values for CustZip, CustEmail, FranchId, MmbrDate for the customers from the Special Event Worksheet. There are also missing values for MerchType for Services and Special Events in the Merchandise table. Additional data collection can resolve this incompleteness as no reliable default value exists.
